

ENERGY POLICY STATEMENT

Through our activities, the Precycle Group creates significant energy savings when compared to the manufacture of new materials and the extraction of raw materials to make these, energy is consumed during collection, processing and transport to market of the materials we recycle.

The Precycle Group is committed to reducing the energy consumed in its operations and processes. By conserving energy, we can reduce our impact on the environment as well as operating more cost effective.

In this policy statement we commit our company to :

- use collection and processing methods that facilitate a commercially optimum level of energy efficiency.
- reduce the amount of energy that we consume to produce and transport our products.
- strives to decrease the use of non-renewable energy resources, where commercially viable.

The policy statement will be regularly reviewed and updated as necessary. The senior management team endorses this policy statement and is fully committed to its implementation.
